

With Zilla, deploy **5x faster** than legacy IGA with proven ROI, including:

**80%**

less effort for access review processes

**60%**

fewer IT tickets associated with provisioning

# ZILLA SECURITY

Stop Drowning in **User Access Reviews** and **Provisioning** Tickets.

Meet Zilla's **breakthrough automation** for identity governance

Zilla is a modern IGA solution that automates identity compliance, provisioning, and security.

## Automate User Access Reviews

Zilla simplifies access reviews and improves audit accuracy and completeness. Reduce prep time by 80% via automation and AI-driven profiles. Keep auditors happy with comprehensive app integration, granular audit trails, and a robust evidence package.

## Simplify Provisioning

Zilla balances efficiency, speed, and security while ensuring end-users get job-appropriate access. Manage joiners, movers, and leavers throughout the lifecycle and leverage AI profiles, federated pre-approvals, ITSM integration that reduces tickets by up to 60%, and offboarding workflows.

## Secure the Identity Perimeter

Ensure least-privilege access and gain continuous visibility over human and non-human identities. Proactively identify and remediate potential exposures from orphaned accounts, excessive permissions and policy violations.

### Most Complete API Integration

- Over 1,000 built-in cloud & on-prem integrations
- Robotic automation for apps without APIs

### AI-Driven Profiles

- AI-driven role discovery and maintenance
- Next generation of RBAC: simple and auditable

### Pre-Approved Access

- Automated approvals for up to 80% of permissions
- Simple maintenance for app, data, permission owners

### Comprehensive Identity Map

- Single source of truth for enterprise-wide permissions
- Visibility for continuous process management

### Proactive Risk Detection

- Automated remediation of identity & access exposures
- Segregation of Duties (SOD) controls

### Automated Evidence Creation

- Auto-populated evidence database and reporting
- Audit trail and system of record for change tracking

## Zilla stands out for its

- ease of use
- quick time to value
- breakthrough automation
